Times table mobile
for your kids room

Learning times tables? Ugh, it can be a bit of a drag, right? Boorrr-iiing. But hey, we get it, and we're here to help you turn this challenge into something fun for your kids!

These bits go on the top of each piece to help them hang nicely.

4×12	48	5×12	60	6×12	72

Step 1

Cut, fold & glue each of the sheets so you have 4 triangular prism like pieces. They should each look like this:

This bit is the flap to join the edges. Glue or tape this to complete the 3D shape

Step 2

Cut these tops out, fold the flaps. Glue or tape them into the tops of the prisms. The dot is where you should put the string through so they hang.

They're shaped like this so you can fit your fingers in to press the glue down.

Step 3

Use some wire or an old coat hanger to make something to hang them from.

It might look something like this. Don't worry if it's not amazing, you won't notice it much. Just try to think about balancing the 4 evenly weighted pieces.

Step 4

Use some sewing thread to tie everything together.
